

# ★ JUNIOR SUMMER CAMP

2009

## Initiative VS. Guilt

## Learning English

Is your kid 5 years old? Then look at this! Age 5 is when your kid is most active and adorable. In this stage your kids should improve in their language & grammar, also they should learn what is right and wrong. Kid's will have new experiences and they will enjoy themselves. Hope to see you there!

## Picnic & Movies

According to Piaget's theory 5 years are Pre-operational, according to him without initiative skills the child may fail to develop normal mental and social developmental skills overall. By learning english the child can improve in their grammar and english skill. For does who can't speak english we teach them the basics. By having Picnics and watching movies kids could socialize and be physically happy:)
